Art Unit: 1644

1. Claims 18-24 are generic to a plurality of disclosed patentably distinct species comprising (A) structurally different types of FcRn binding partners including IgG, IgG Fc fragments; (B) conjugates comprising materially different bioactive substances, such as those enumerated by claim 24; and (C) different methods of delivery (i) oral, (ii) sublingual, (iii) intranasal aerosol, (iv) intranasal non-aerosol. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, by electing one type of conjugate and method of delivery, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any

amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thomas Cunningham whose telephone number is (703) 308-3968.
